Project Design Phase-II

Data Flow Diagram & User Stories

Date	21-10-2026
Team ID	23KD1A0571
Project Name	Employee Raise Issue – Record Producer & Service Portal Integration Guide
Maximum Marks	4 Marks

Data Flow Diagrams:

Figure 1 follows the data. The employee opens the portal, picks the Raise an Issue widget and fills the Record Producer form; the form rules check the values and the new record is stored with its own number. Requester names come from sys_user and the Assignment group from sys_user_group.

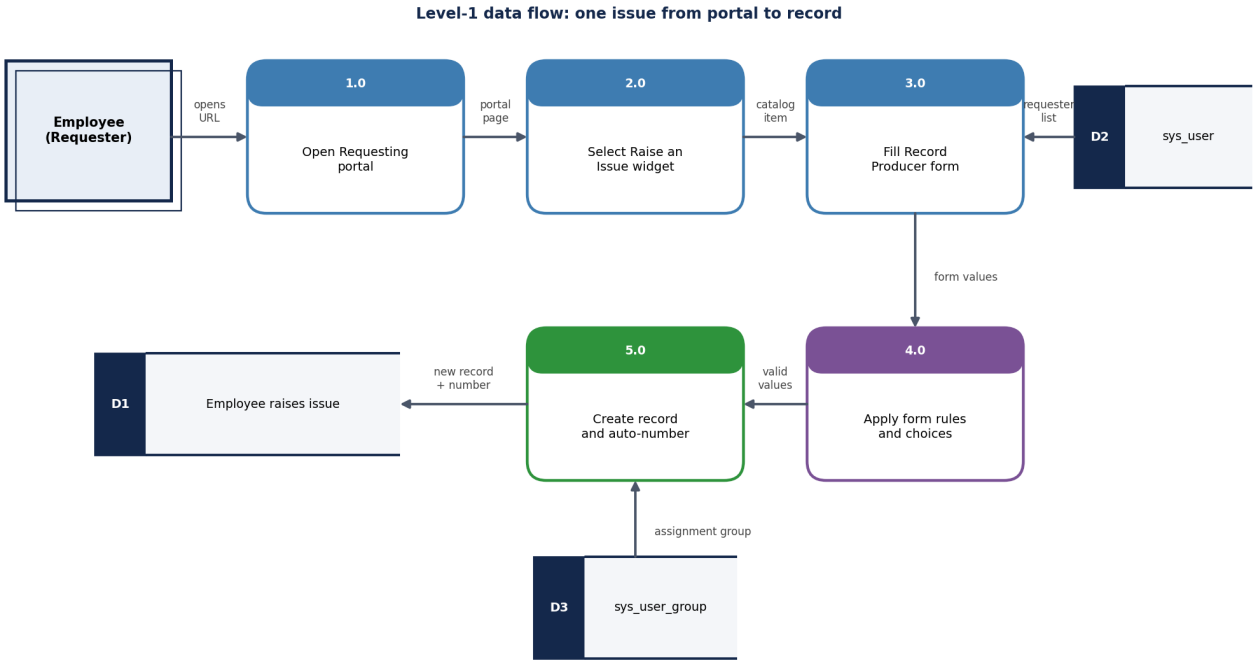

Figure 1 – Level-1 data flow diagram

Figure 2 shows the same journey as a sequence of steps between the employee and the parts of the solution, in the order they happen.

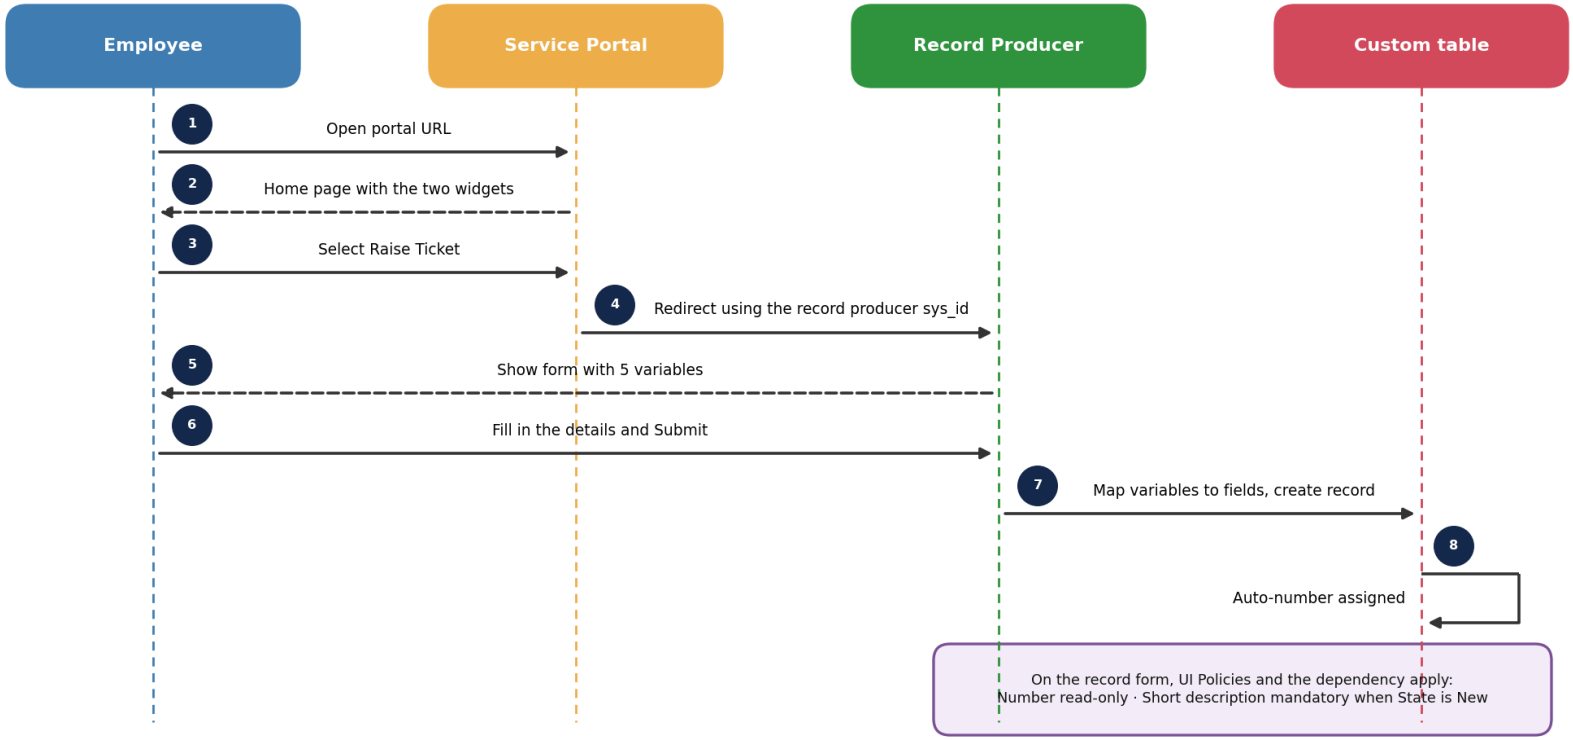

Figure 2 – Sequence of raising one issue

User Stories

The user stories below cover the employee who raises an issue and the administrator who sets the solution up. Priority marks how much the rest of the flow depends on the story, and Release refers to the phase of the project in which it was built.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Employee (Requester)	Portal Access	USN-1	As an employee, I can open the Requesting portal from its URL.	The portal home page loads with the Raise an Issue widget.	High	Phase 5
Employee (Requester)	Portal Widgets	USN-2	As an employee, I can use the Raise an Issue widget to open the issue form.	Selecting Raise Ticket opens the “Raise Employee Issue” form.	High	Phase 6
Employee (Requester)	Issue Submission	USN-3	As an employee, I can choose a category and subcategory for my issue.	Values from the defined choice lists can be selected.	High	Phase 4
Employee (Requester)	Issue Submission	USN-4	As an employee, I can enter the requester, short description and state.	The entered values are captured when the form is submitted.	High	Phase 4
Employee (Requester)	Issue Submission	USN-5	As an employee, I can submit the issue form.	A record is created in “Employee raises issue” with an auto-generated number.	High	Phase 4
Employee (Requester)	Form Rules	USN-6	As an employee, I am asked for a short description when the state is New.	Short description becomes mandatory when State is New.	High	Phase 3
Employee (Requester)	Form Rules	USN-7	As an employee, I see only the subcategory that matches my category.	Network shows VPN, Hardware shows Laptop, Software shows Server, Access shows Forgot password.	Medium	Phase 3
Employee (Requester)	Form Rules	USN-8	As an employee, I cannot change the issue number.	The Number field is read-only on the form.	Medium	Phase 3
Administrator	Application Setup	USN-9	As an administrator, I can create the Employee Center scoped application.	The application appears as the current application in Studio.	High	Phase 1
Administrator	Data Management	USN-10	As an administrator, I can create the “Employee raises issue” table with its fields and auto-number.	The table is saved with all eight fields and numbers are generated automatically.	High	Phase 2
Administrator	Portal Setup	USN-11	As an administrator, I can configure the Requesting portal and its portal page.	The portal opens at employee_request with the Employee Center theme and menu.	High	Phase 5
Administrator	Portal Widgets	USN-12	As an administrator, I can create the two widgets and place them in a 6 | 6 container.	Both widgets display side by side on the portal page.	Medium	Phase 6
Administrator	Testing	USN-13	As an administrator, I can test the flow from portal to saved record.	Portal, widgets, link, submission and field restrictions work as configured.	Medium	Phase 7
